

FILAMENT / TOW CUTTING STAND ALONE PILOT CAPABILITIES

Cutting Machine:

To develop and conduct research on Needleponched nonwoven materials, COE Indutech has pilot Needleponched bonding station from DILO, Germany. With web already prepared one can use this machine to bond fibers in the web to make needled nonwoven mat. With two set of needle boards on up – down stroke this machine can make needled product from 80 gsm to 400 gsm with final product width around 0.5m.
