

# THERMAL BOND NONWOVEN PILOT PRODUCTION CAPABILITIES

## Thermal bond Nonwoven Pilot Production

To develop and conduct research on Thermal Bonded nonwoven materials, COE Indutech has established pilot Thermal bonding machine. This machine is capable of making thermal bonded nonwovens from 80 gsm o 400 gsm with max width of 0.6m. Temperature upto 230c can be reached with this machine and the gaps between the calendar rolls are adjustable with pneumatic loading.
