## GARDEN RECREATION

**DATE** : 11/04/2023 – 05/05/2023

**VENUE** : Ladies Hostel, PSG Tech

**“He who plants a tree, plants a hope.”**

As this quote says, National Service Scheme of PSG College of Technology took the mission of turning an old park into a functional area with an **herbal garden**. The recreated area is a part of PSG Tech Ladies Hostel where it had a children’s playground. With around NSS **100 volunteers** and NSS programme officers, this camp started off on April 11<sup>th</sup>, 2023.

In the very first week of work, the damaged playground equipment was removed and the area was cleaned. The following week was utilized for levelling the area and making the soil ready for planting herbs and shrubs around the playground. Bio-fertilizers, rice husk and coco peat were added to the soil for better plant growth. Then the best plants were chosen and planted in the third week. Medicinal plants like **Tulsi, Rosemary, Karpooravalli, Vetti ver, Thuthuvalai**, etc were planted, making it useful for the students and staff around that area.

After **25 days** of hard work, this recreation camp came to an end with the herbal garden being successfully established, achieving the mission of transforming an old area into a functional park. The garden is being maintained by NSS volunteers on a regular basis.
